

A Dockerfile seems  
like a pancake?

# if (Dockerfile === Pancake )

Layer 0

```
FROM dockerfile/ubuntu
```

Layer 1

```
# Install Nginx.
```

```
RUN ¥
```

```
ad
```

```
ap
```

```
apt-get install -y nginx && ¥
```

```
rm -rf /var/lib/apt/lists/* && ¥
```

```
echo "¥ndaemon off:" >> /etc/nginx/nginx.conf && ¥
```

```
chown -R www-data:www-data /var/lib/nginx
```

Layer 2

```
VOLUME ["/etc/nginx/sites-enabled", "/etc/nginx/certs", "/etc/nginx/conf.d",  
"/var/log/nginx", "/var/www/html"]
```

Layer 3

```
WORKDIR /etc/nginx
```

Layer 4

```
CMD ["nginx"]
```

Layer 5

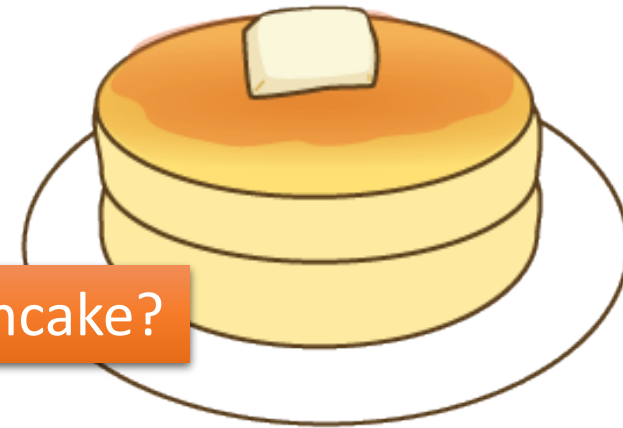

```
EXPOSE 80
```

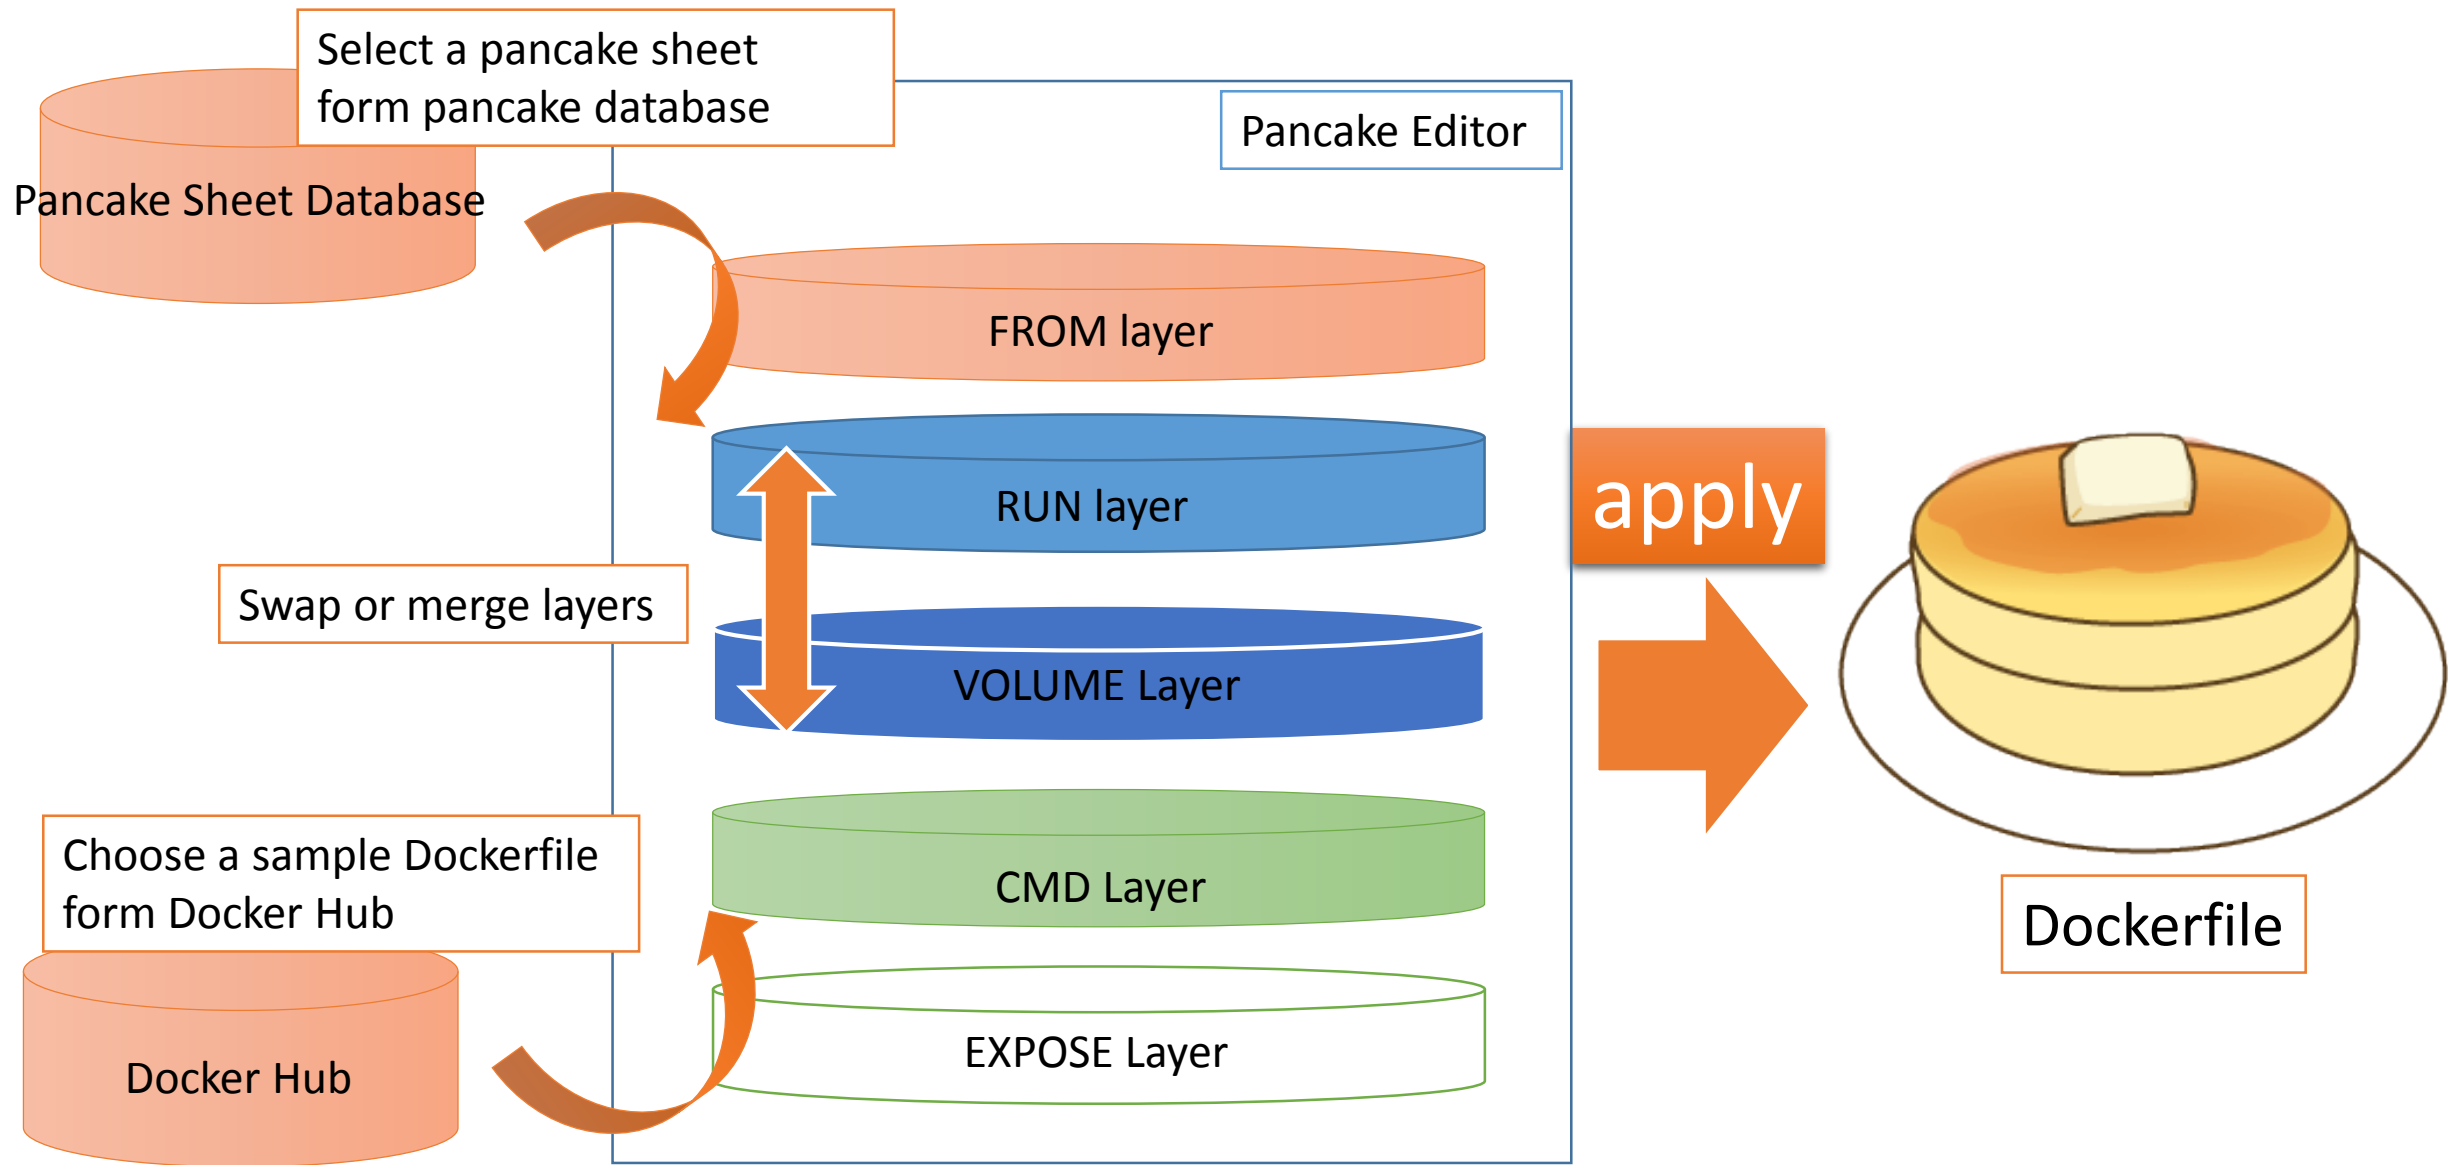

Layer 6

```
EXPOSE 443
```

Dockerfile can divide to individual layers

It seems like a pancake?

Building Dockerfiles made easy and fun  
just pick and pile pancake pieces on the editor!
