Pancake

Hello!

Tetsuro Ayano
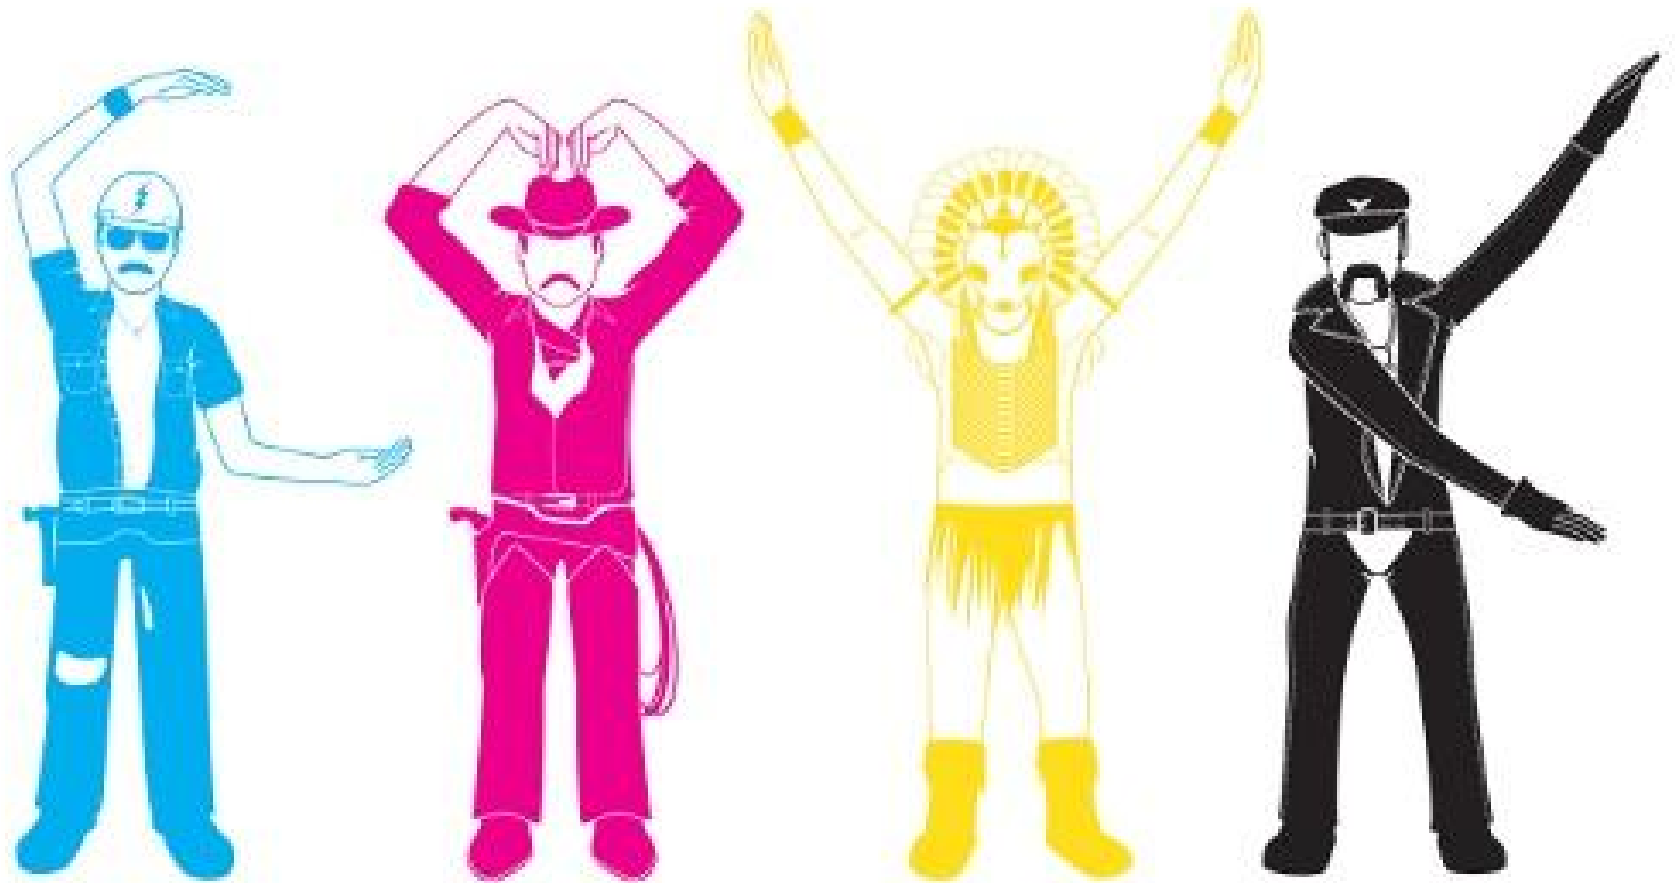

Hari P. Kunamneni

Roslyn Lau

Gideon Kory

1.

Problem

Takes a village of expert engineers to build any app

No one can do it alone

2.
## Solution

Welcome to Pancake

Container application

Pancake is **visually configurable framework to build a Docker package**

Does 3 things

Composition

↓

Validation

↓

Integration

Process flow

Select a pancake sheet form pancake database

Pancake Editor

Pancake Sheet Database

FROM layer

RUN layer

Swap or merge layers

VOLUME Layer

apply

Choose a sample Dockerfile form Docker Hub

CMD Layer

Docker Hub

EXPOSE Layer

Dockerfile

Building Dockerfiles made easy and fun just pick and pile pancake pieces on the editor!

Let's review some criteria

Novelty
No one done it before

Fit
Fundamentally enable it

Efficiency
Implementation still need to be completed, this is an design phase

Intergration
still need to be architected with RESTful APIs

Transparency
The code will be open source and yes, it can be recreated

Submission
Absolutely!

Let's review some criteria

Usefulness
No one done it before

Longevity
Yes, can be build upon

Thanks!

Any questions?
